SPRING SUMMER 2027 - DROP 1

ARIMA

Basque, soul.

Growing crops is an intentional act; dressing is an extension of that same mindset.

The earth is the origin of everything we are and share. The products we plant and care for before eating them are acts of creation, shaped by the time we devote to respecting their rhythms and by the collective memory transmitted through them.

That same respectful process lives on in our fabrics, grown and developed with care for the land and the people who work it, turning dressing into a continuation of those values.

This collection celebrates the local as a means of sustaining living communities and fostering a more authentic relationship with our environment. ARIMA is the root, the beginning, and the connection to the essential.

DROP 1 ARIMA, SEED

This first drop is designed for cooler months. Garments feature structured knits, layered silhouettes, and durable fabrics that provide warmth and versatility. Pieces are easy to mix and match, offering comfort and style during transitional weather.

MADE TO BE MIXED AND MATCHED

Our prints are born from the dialogue
between past and present. They
reinterpret traditional
textures, gestures, and patterns,
translating them into a contemporary
language. Every line, every shape, is
a reminder that what connects us
endures through time.

IT'S BETTER WHEN IT'S CERTIFIED

GOTS (Global Organic Textile
Standard) certification means that the
fibres are organic, the manufacturing
processes are less polluting and
the working conditions comply
with international standards. An
independent organization monitors
the factories every year.

Fairtrade® is a way to conduct
business that guarantees that farmers
at the origin of our cotton are paid
fairly; it also gives them subsidies for
developing community projects.

WE WOULDN'T BE THE SAME WITHOUT THE PEOPLE WE WORK WITH

Since 2017, we work with Chetna, a farmer coalition from India. Environmentally, we create regenerative agriculture, promoting ecosystem resilience, genetic diversity of seeds, and reducing the water footprint.

On the social side, it reduces inequality in countries and assures living wages for small farmers, women empowerment, and food security.

Certified Organic Cotton

This fiber uses 91% less water and means cleaner air, better soil and better livelihoods for our farmers. This organic cotton is grown to have a low impact on the environment. This means no use of toxic fertilizers and pesticides and maintenance of soil fertility.

ABOUT THE FABRIC
Low environmental impact fabric. Produced without toxic substances. Less water consumption. Resistant and durable. Natural and breathable feel.

IT'S BETTER WHEN IT'S CERTIFIED
Our organic cotton is organic & Fairtrade® certified.

GOTS (Global Organic Textile Standard) certification means that the fibres are organic, the manufacturing processes are less polluting and the working conditions comply with international standards. An independent organization monitors the factories every year.

Fairtrade® is a way to conduct business that guarantees that farmers at the origin of our cotton are paid fairly; it also gives them subsidies for developing community projects.

- TAKE CARE OF IT**
- Organic cotton can be machine or handwashed.
 - To avoid them from shrinking and keep them like the first day, wash 30°C.
 - Hang cotton out to dry, as dryers can make the piece shrink. It also saves energy :)
 - As a recommendation, use natural soap.

 "Organic" certified by Ecocert Greenlife F32600, license number: 127906 SKFK.

 Fairtrade® means better conditions and opportunities for cotton producers in developing countries to invest in their businesses and communities for a sustainable future.

WE WOULDN'T BE THE SAME WITHOUT THE PEOPLE WE WORK WITH

Since 2017, we work with Chetna, a farmer coalition from India. Environmentally, we create regenerative agriculture, promoting ecosystem resilience, genetic diversity of seeds, and reducing the water footprint.

On the social side, it reduces inequality in countries and assures living wages for small farmers, women empowerment, and food security.

– Every time we use a Fairtrade® certified organic product, we are generating a social and environmental commitment.

Cotton + Linen

A breathable blend with character. Our cotton-linen canvas combines the softness of organic cotton with the natural freshness and strength of linen. A go-to choice for warm days, this fabric brings together durability and comfort with a low-impact footprint.

ABOUT THE FABRIC
Light and breathable, with a slightly textured touch that gives it a summery, lived-in feel. It's soft on the skin, holds its shape, and gets better with every wear.

- TAKE CARE OF IT**
- Air your clothes after wearing them, and only wash them when needed.
 - Hand wash it or machine wash at max 30°C.
 - Hang to dry.
 - As a recommendation, use natural soap.

Very durable and with refreshing properties. Breathable and with high moisture absorption.

- TAKE CARE OF IT**
- Air your clothes after wearing them, and only wash them when needed.
 - Hand wash it or machine wash at max 30°C.
 - Hang to dry.
 - As a recommendation, use natural soap.

Linen

Linen is one of the most environmentally friendly fibers. When growing, linen uses all the resources in the soil, and it does not need more water than rain. When collecting it, linen does not leave any waste behind, as the entire plant is used. And what's better: it's the most resistant fiber in the textile industry and the more you wash it, the softer it becomes!

ABOUT THE FABRIC
It is a strong and light fabric.

Lenzing™ Ecovero™

LENZING™ ECOVERO™ is the responsible viscose. Not only do we save 50% on emissions and water, but it's also made of sustainable wood pulp. In two words: responsible production.

We use 100% FSC Certified Viscose, meaning natural wood fibres sourced from sustainably managed plantations, and transformed into cellulose fibres and again into cute clothes.

ABOUT THE FABRIC
It is a soft fabric against the skin. Fluid and light. Very cool fabric ideal for summer. High absorbency and breathability.

- TAKE CARE OF IT**
- When washing, select gentle cycle with low spin and wash cold or below 30°C.
 - Remember to hang them in the air to dry, it's better for the Planet.
 - As a recommendation, use natural soap.

Tencel™ Modal & Lyocell

TENCEL™ Modal & Lyocell fibers are extracted from an environmentally responsible process. The fibers are certified as compostable and biodegradable, and thus can fully revert back to nature.

ABOUT THE FABRIC
Achieves vivid colours. With bright finishes. Very soft touch as if it were a second skin. Very fresh and with a lot of drape. Resistant and durable.

It's a cool and soft fabric. It has a great moisture absorption capacity.

- TAKE CARE OF IT**
- When washing, select gentle cycle with low spin and wash cold or below 30°C.
 - Remember to hang them in the air to dry, it's better for the Planet.

- As a recommendation, use natural soap.

Recycled Polyester

We choose recycled polyester, which uses less energy to make, diverts plastic from the sea or landfill, and makes for a supersoft feel. Instead of throwing them away, plastic bottles can be used to produce new clothes. These pieces are fluffy, durable and allow savings in production. Waste never looked so good!

ABOUT THE FABRIC
It is a fabric with a long wear resistance. Waterproof and flexible.

- TAKE CARE OF IT**
- Air your clothes after wearing them, and only wash them when needed.
 - Hand wash it or machine wash at max 30°C.
 - Hang to dry.
 - As a recommendation, use natural soap.

PRINTS THAT TRANSFORM CLOTHING INTO STORIES

At the heart of ARIMA are two key prints that embody the collection's spirit and connect directly to everyday Basque life:

Salad reflects the act of cultivation itself. It evokes care, time, and awareness — the quiet, deliberate gestures that transform seeds into growth. This print carries the philosophy of the collection: that attention to process and respect for nature are as essential in dressing as they are in farming.

Mahaia draws inspiration from traditional Basque ceramics and table linens, with repeating stripes and checks that mirror the rhythms of daily life. It bridges heritage and craft, connecting modern garments to the textures, colors, and stories of local culture.

Salad

A print inspired by the act of cultivation and the direct relationship with the earth. It represents the care, time, and awareness behind everything that grows and transforms.

Mahaia

Stripes and checks inspired by traditional Basque ceramics and table linens, where motifs are repeated and interact as part of everyday life. Graphic codes that originate in the rural environment and connect with our textile roots.

Sunset in the Design Etxea

@maia.curutchet

This print captures the quiet moment when the sun sets over the Design Etxea — the place where ideas begin to take shape. Colours fade into one another like thoughts in motion, reflecting the atmosphere of creation and the deep connection between place and process.

SPRING SUMMER 2027 - DROP 2

ARIMA

Basque, soul.

Growing crops is an intentional act; dressing is an extension of that same mindset.

The earth is the origin of everything we are and share. The products we plant and care for before eating them are acts of creation, shaped by the time we devote to respecting their rhythms and by the collective memory transmitted through them.

That same respectful process lives on in our fabrics, grown and developed with care for the land and the people who work it, turning dressing into a continuation of those values.

This collection celebrates the local as a means of sustaining living communities and fostering a more authentic relationship with our environment. ARIMA is the root, the beginning, and the connection to the essential.

DROP 2 ARIMA, HARVEST

The second drop introduces lighter fabrics and breathable knits, perfect for warmer days. Colors are brighter and designs are more fluid, reflecting the freshness of spring.

IT'S BETTER WHEN IT'S CERTIFIED

Our organic cotton is organic & Fairtrade® certified.

GOTS (Global Organic Textile Standard) certification means that the fibres are organic, the manufacturing processes are less polluting and the working conditions comply with international standards. An independent organization monitors the factories every year.

Fairtrade® is a way to conduct business that guarantees that farmers at the origin of our cotton are paid fairly; it also gives them subsidies for developing community projects.

**LENZING™
ECOVERO™**

Lenzing™ Ecovero™ is the responsible viscose. Not only do we save 50% on emissions and water, but it's also made of sustainable wood pulp. In two words: responsible production.

We use 100% FSC Certified Viscose, meaning natural wood fibres sourced from sustainably managed plantations, and transformed into cellulose fibres and again into cute clothes.

About the fabric: It is a soft fabric against the skin. Fluid and light. Very cool fabric ideal for summer. High absorbency and breathability.

SS27 COLLECTION BY FIBER

What we wear matters, and it all begins with the fiber. Our SS27 collection is made with carefully chosen, low-impact fibers reflecting our commitment to sustainability and durability. Each piece is designed to a slower way of dressing, rooted in respect for people and planet.

Certified Organic Cotton

This fiber uses 91% less water and means cleaner air, better soil and better livelihoods for our farmers. This organic cotton is grown to have a low impact on the environment. This means no use of toxic fertilizers and pesticides and maintenance of soil fertility.

ABOUT THE FABRIC
Low environmental impact fabric. Produced without toxic substances. Less water consumption. Resistant and durable. Natural and breathable feel.

IT'S BETTER WHEN IT'S CERTIFIED
Our organic cotton is organic & Fairtrade® certified.

GOTS (Global Organic Textile Standard) certification means that the fibres are organic, the manufacturing processes are less polluting and the working conditions comply with international standards. An independent organization monitors the factories every year.

Fairtrade® is a way to conduct business that guarantees that farmers at the origin of our cotton are paid fairly; it also gives them subsidies for developing community projects.

- TAKE CARE OF IT**
- Organic cotton can be machine or handwashed.
 - To avoid them from shrinking and keep them like the first day, wash 30°C.
 - Hang cotton out to dry, as dryers can make the piece shrink. It also saves energy :)
 - As a recommendation, use natural soap.

 "Organic" certified by Ecocert Greenlife F32600, license number: 127906 SKFK.

 Fairtrade® means better conditions and opportunities for cotton producers in developing countries to invest in their businesses and communities for a sustainable future.

WE WOULDN'T BE THE SAME WITHOUT THE PEOPLE WE WORK WITH

Since 2017, we work with Chetna, a farmer coalition from India. Environmentally, we create regenerative agriculture, promoting ecosystem resilience, genetic diversity of seeds, and reducing the water footprint.

On the social side, it reduces inequality in countries and assures living wages for small farmers, women empowerment, and food security.

– Every time we use a Fairtrade® certified organic product, we are generating a social and environmental commitment.

Cotton + Linen

A breathable blend with character. Our cotton-linen canvas combines the softness of organic cotton with the natural freshness and strength of linen. A go-to choice for warm days, this fabric brings together durability and comfort with a low-impact footprint.

ABOUT THE FABRIC
Light and breathable, with a slightly textured touch that gives it a summery, lived-in feel. It's soft on the skin, holds its shape, and gets better with every wear.

- TAKE CARE OF IT**
- Air your clothes after wearing them, and only wash them when needed.
 - Hand wash it or machine wash at max 30°C.
 - Hang to dry.
 - As a recommendation, use natural soap.

Linen

Linen is one of the most environmentally friendly fibers. When growing, linen uses all the resources in the soil, and it does not need more water than rain. When collecting it, linen does not leave any waste behind, as the entire plant is used. And what's better: it's the most resistant fiber in the textile industry and the more you wash it, the softer it becomes!

ABOUT THE FABRIC
It is a strong and light fabric.

Very durable and with refreshing properties. Breathable and with high moisture absorption.

- TAKE CARE OF IT**
- Air your clothes after wearing them, and only wash them when needed.
 - Hand wash it or machine wash at max 30°C.
 - Hang to dry.
 - As a recommendation, use natural soap.

Lenzing™ Ecovero™

LENZING™ ECOVERO™ is the responsible viscose. Not only do we save 50% on emissions and water, but it's also made of sustainable wood pulp. In two words: responsible production.

We use 100% FSC Certified Viscose, meaning natural wood fibres sourced from sustainably managed plantations, and transformed into cellulose fibres and again into cute clothes.

ABOUT THE FABRIC
It is a soft fabric against the skin. Fluid and light. Very cool fabric ideal for summer. High absorbency and breathability.

- TAKE CARE OF IT**
- When washing, select gentle cycle with low spin and wash cold or below 30°C.
 - Remember to hang them in the air to dry, it's better for the Planet.
 - As a recommendation, use natural soap.

Tencel™ Modal & Lyocell

TENCEL™ Modal & Lyocell fibers are extracted from an environmentally responsible process. The fibers are certified as compostable and biodegradable, and thus can fully revert back to nature.

ABOUT THE FABRIC
Achieves vivid colours. With bright finishes. Very soft touch as if it were a second skin. Very fresh and with a lot of drape. Resistant and durable.

It's a cool and soft fabric. It has a great moisture absorption capacity.

- TAKE CARE OF IT**
- When washing, select gentle cycle with low spin and wash cold or below 30°C.
 - Remember to hang them in the air to dry, it's better for the Planet.

- As a recommendation, use natural soap.

Recycled Polyester

We choose recycled polyester, which uses less energy to make, diverts plastic from the sea or landfill, and makes for a supersoft feel. Instead of throwing them away, plastic bottles can be used to produce new clothes. These pieces are fluffy, durable and allow savings in production. Waste never looked so good!

ABOUT THE FABRIC
It is a fabric with a long wear resistance. Waterproof and flexible.

- TAKE CARE OF IT**
- Air your clothes after wearing them, and only wash them when needed.
 - Hand wash it or machine wash at max 30°C.
 - Hang to dry.
 - As a recommendation, use natural soap.

ARIMA IS THE ROOT, THE BEGINNING, AND THE CONNECTION TO THE ESSENTIAL

Arima, Basque. Soul.

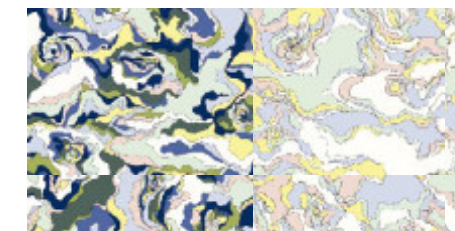

PRINTS THAT TRANSFORM CLOTHING INTO STORIES

At the heart of ARIMA are two key prints that embody the collection's spirit and connect directly to everyday Basque life:

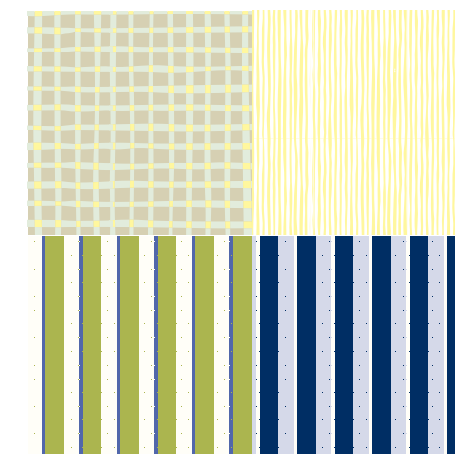

Salad reflects the act of cultivation itself. It evokes care, time, and awareness — the quiet, deliberate gestures that transform seeds into growth. This print carries the philosophy of the collection: that attention to process and respect for nature are as essential in dressing as they are in farming.

Mahaia draws inspiration from traditional Basque ceramics and table linens, with repeating stripes and checks that mirror the rhythms of daily life. It bridges heritage and craft, connecting modern garments to the textures, colors, and stories of local culture.

Salad

A print inspired by the act of cultivation and the direct relationship with the earth. It represents the care, time, and awareness behind everything that grows and transforms.

Mahaia

Stripes and checks inspired by traditional Basque ceramics and table linens, where motifs are repeated and interact as part of everyday life. Graphic codes that originate in the rural environment and connect with our textile roots.

Earth's Skin

[@insta_grems](#)

An abstract camouflage drawn from the skin of the earth. Organic textures and layered tones echo soil, stone and sediment — a landscape translated into pattern, where nature becomes a living surface.

DRESSES

Draped or structured, our dresses explore geometry in motion. Clean cuts, precise seams, and fluid lines enhance natural movement while maintaining architectural balance. Every shape is designed to create a sense of form and ease.
